

# Ignite! Learning – Saving a Lesson

Saving Lesson in the Ignite! Learning program allows for quick access to specific topics and enables teachers to create notes for those lessons.

1. Use the Standards or Units Search to find a Topic or group of Topics that you would like to “bookmark.”
2. Below the Lesson Content fill in the box labeled “Lesson Name:” and choose Create.

3. The Lesson is now saved and can be accessed by choosing the Lesson under the Saved Lessons box in the upper left corner.

4. You are also able to add notes for a lesson by choosing the Notes Tab on the upper right side and making any notes for the lesson.
