

# GPO (Group Policy Object) Configuration for EON 1.0 MSI Files

1. Open Group Policy Management.
2. Select Domains and your domain
3. Right Click on the Organizational Unit you are creating the GPO for.
4. Click Edit. (Group Policy Object Editor window will open.)
5. Select Computer Configuration and Software Settings.

Note: The MSI file must be on a network share that is accessible to all of the client workstations where EON will be installed. This network share may not reside on the GPO server.

6. Right Click Software Installation.
7. Select New and Project.
8. Select the .MSI file to be deployed.

9. Right Click Software Installation.
10. Click Properties.
11. Verify the Default Package Location based on the location of the MSI file.

12. Click Ok.

This GPO should deploy to the specified clients on their next reboot.
